

ComicCraft – AI Comic Story Creator using Gemini Models

Sub topic **Frontend Development**

Activity 4.1: Designing and Developing User Interface with Python

- Technology: Python + Flask
- Frontend: HTML, CSS, Bootstrap
- Backend Integration: Python Flask
- AI Integration: Gemini Models
- Objective: Create a simple, attractive, and user-friendly interface for generating AI-powered comic stories.

Slide 2 — User Interface Design

Designing the ComicCraft Interface

The user interface is designed to make comic creation simple and interactive.

Main UI Components:

- 🏠 Home page with project introduction
- ✍️ Story input form
- 👤 Character details section
- 🎭 Theme and genre selection
- 🖱️ Story generation button
- 📖 Generated comic story display
- ↻ Option to create another story

Design Goals:

- Simple navigation
- Responsive layout
- Easy-to-use input fields
- Clear buttons and labels
- Attractive comic-style presentation

Slide 3 — Developing the Frontend with Python & Flask

Flask Template Integration

Python Flask connects the frontend pages with the application logic.

```
from flask import Flask, render_template

app = Flask(__name__)

@app.route("/")
def home():
    return render_template("index.html")

@app.route("/create")
def create():
    return render_template("create.html")

if __name__ == "__main__":
    app.run(debug=True)
```

Frontend Structure:

Slide 4 — Comic Creation Form

Interactive User Input Page

The `create.html` page collects the information required to generate a comic.

```
<form action="/generate" method="POST">

    <label>Comic Theme</label>
    <input type="text" name="theme"
          placeholder="Enter your theme">

    <label>Characters</label>
    <input type="text" name="characters"
          placeholder="Enter character names">

    <label>Story Idea</label>
```

```
<textarea name="story"
          placeholder="Describe your idea"></textarea>

<button type="submit">
  Generate Comic
</button>

</form>
```

User Flow:

Enter Details → Submit Form → Python Backend → Gemini AI → Generated Comic

Slide 5 — Milestone 4 Outcome

Activity 4.1: Frontend Development Completed

Key Achievements:

- Developed the ComicCraft home page.
- Created an interactive comic creation form.
- Connected HTML templates with Python Flask.
- Added CSS styling for an attractive interface.
- Designed pages for displaying AI-generated stories.
- Created a responsive and user-friendly layout.
- Connected frontend input with the Gemini-powered backend.

Final Frontend Workflow

Outcome:

A functional and user-friendly frontend interface was developed for the **ComicCraft AI Comic Story Creator**.
